ELECTION/RESTRICTION

1. This application contains claims directed to the following patentably distinct molecules: nucleic acids having the SEQ ID NOS 1-52,202, and nucleic acids encoding the multitude of proteins set forth in Table 1.

2. MPEP 803.04 states:

Nucleotide sequences encoding different proteins are structurally distinct chemical compounds and are unrelated to one another. These sequences are thus deemed to normally constitute independent and distinct inventions within the meaning of 35 U.S.C. 121. Absent evidence to the contrary, each such nucleotide sequence is presumed to represent an independent and distinct invention, subject to a restriction requirement pursuant to 35 U.S.C. 121 and 37 CFR 1.141 *et seq.*

3. The numerous molecules encompassed by the instant claims are patentably distinct by virtue of having different structures and encoding proteins having different functions. As set forth above, these molecules are deemed to normally constitute independent and distinct inventions within the meaning of 35 U.S.C. 121. A reference against one molecule would not be a reference against another, and, in view of this and the multitude of sequences submitted for examination by the USPTO, a search of molecules encoding more than one structurally and functionally distinct protein would pose a serious burden. Thus, **Applicants must elect a single SEQ ID NO or elect nucleic acids encoding a single protein selected from Table 1.** If a single SEQ ID NO is elected, Applicants should further identify the protein of Table 1, if any, that corresponds to the elected invention. If Applicants elect nucleic acids encoding a single protein of Table 1, Applicants should further identify the SEQ ID NO or SEQ ID NOS that encode that protein.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added.

This is not an election of species. Examination will be restricted to the elected molecule.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Diana B. Johannsen whose telephone number is 703/305-0761. The examiner can normally be reached on Monday-Friday, 7:30 am-4:00 pm.
